

Expanded for Winter Quarter, 2009

Science & Society 25

CRN 50427 – 50438

Global Climate Change:

**Convergence of Geophysical,
Biological, & Social Sciences**

Ice-Free Earth (hint: locate Davis, CA)

Lectures: Tue. & Thur. 5:10 – 6:00 pm, Social Sci. 1100

Discussion: Various times, one hour per week

This 3-unit GE course (credit for Diversity, Science-Engineering, Social Sciences, & Writing) will explore the geophysical factors that influence climate and assess the biological and sociological consequences of climate change. Topics include methods used by different scientists, complexity of international affairs, decision making under uncertainty, and cultural views of risk.
