

GGG 292 (CRN 83848) Fall 2011 Seminar in Genomics & Epigenetics		
1022 Life Sciences -- Mondays at 4:10 pm		
Date	Speaker	Title
26-Sep	Claude dePamphilis Pennsylvania State Univ	<i>Evolutionary and functional genomics of parasitic plants.</i>
3-Oct	Jennifer Nemhauser University of Washington	<i>The (il)logic of plant hormone signaling</i>
10-Oct	Wesley Warren Genome Institute, Washington Univ	<i>The enigma of the platypus genome</i>
17-Oct	Daniel Zilberman UC Berkeley	<i>DNA methylation dynamics of plant sexual reproduction</i>
24-Oct	Francois Roudier INRA/ENS (France)	<i>Functional organization and developmental dynamics of the Arabidopsis epigenome</i>
31-Oct	Vanessa Hayes J. Craig Venter Institute, San Diego	<i>Mapping the Extent of Human Genome Diversity</i>
7-Nov	Mike Snyder Stanford University	<i>Adventures in Personal Genomics: Analysis of Genomes and Whole Omics Profiling</i>
14-Nov	Steve Henikoff Fred Hutchison Cancer Research Center	<i>Histone variants, nucleosome dynamics and epigenetic inheritance</i>
21-Nov	Nicole King UC Berkeley	<i>Choanoflagellate colony development as a new model for studying host-microbe interactions</i>
28-Nov	Luke Hickey Illumina	<i>PacBio Single Molecule Sequencing, Technology and Applications</i>
