

Alternatives in Agriculture Seminar Series - Winter 2013 (PLS 190 – IAD 290)

Tuesdays, 4:10 to 6:00 101 Bowley

The Winter 2013 Alternatives in Agriculture Seminar will focus on two broad topics:

1. Plant genetic resource conservation, utilization and control; and,
2. Globalization within the food system.

This two hour weekly seminar will include diverse formats, typically including presentations by guest speakers and small group discussions/activities. Guest speakers and student discussions/activities will explore diverse aspects of, perspectives on, and connections between these two topics including the challenges they include and diverse approaches to meeting those challenges.

Registration information:

Undergraduates: enroll in PLS 190 (sec 1) CRN 67672

Graduates: enroll in IAD 290 (sec 1) CRN 58649

This course is graded P/NP (PLS 190) or S/U (IAD 290)
