

**Plant Pathology 290
Graduate Seminar Series
Spring Quarter 2009**

**Seminars will be held from 12:10-1:00 PM on
Mondays - 115 Hutchison**

Date	Speaker	Title
March 30	Mary Wildermuth, Department of Plant and Microbial Biology, UC Berkeley	Temporal and spatial resolution allows identification of novel defense-associated regulators and their associated processes
April 6	Andy Jackson, Department of Plant and Microbial Biology, UC Berkeley	Barley stripe mosaic virus and its movement processes
April 13	Claude Fauquet, Danforth Institute	Intimate relationships between geminiviruses and gene silencing
April 20	Gholam Hosein Shahidi Bonjar, Visiting Professor, Department of Plant Pathology, UC Davis	<i>Streptomyces</i> spp. as biocontrol agents
April 27	Melody Meyer, Department of Plant Pathology, UC Davis – Exit seminar	Identification of factors mediating cold therapy of <i>Xylella fastidiosa</i> -infected grapevines
May 4	Richard Michelmore, Genome Centre, UC Davis	Comparative and functional genomics of disease resistance in plants
May 11	Karen McDonald, Chemical Engineering, UC Davis	Plant pathogens put to profitable use: The CMViva system
May 18	Lindsey du Toit, Washington State University	Developing integrated disease management programs for vegetable seed crops in the Pacific Northwest
May 25	UC HOLIDAY – Memorial Day	
June 1	Patcharavipa Chaijuckam, Department of Plant Pathology, UC Davis – Exit Seminar	Population structure of <i>Rhizoctonia oryzae-sativae</i> in paddy rice fields in California by microsatellite analysis

To schedule an appointment with a speaker, please contact Martina McGloughlin (mmmccgloughlin@ucdavis.edu) or Elizabeth Jeffery (emjeffery@ucdavis.edu).
